EDUCATION

Shivalik College Of Engineering, Dehradun
Bachelor of Technology in Computer Science and Engineering

Aug 2023 – 2027
CGPA: 8.64/10.0

TECHNICAL SKILLS

Programming Languages: Java, C++, Python, SQL, JavaScript
Backend Distributed Systems: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, RESTful APIs, Microservices, JWT, OAuth2
Web Technologies: HTML5, CSS3, React.js, Angular, Tailwind CSS
Databases Caching: MySQL, PostgreSQL, MongoDB, Oracle, Redis
Testing, DevOps Cloud: JUnit, Mockito, Docker, Jenkins, CI/CD, AWS, Azure
Tools: Git, GitHub, Maven, Gradle, Postman, Swagger, IntelliJ IDEA, VS Code
Computer Science Fundamentals: Object-Oriented Programming, Data Structures, Algorithms, Complexity Analysis, Problem Solving, Database Design, Design Patterns, Multithreading, Agile, Scrum, SDLC

EXPERIENCE

Explorin *June 2024 – August 2024*
Roorkee, Uttarakhand
Software Development Intern

- Developed and optimized RESTful backend APIs, improving data transfer efficiency by 30% while supporting the delivery of 8 new application features.
- Designed and implemented secure backend functionality using Node.js and JWT-based authentication and authorization, enabling role-based access control (RBAC) for protected resources.
- Built and maintained scalable server-side modules using Node.js and MongoDB, collaborating with the development team to deliver reliable software functionality and apply effective problem-solving practices.

PROJECTS

Enterprise Job Portal System — 🐙 *2026*
Tech Stack: Java, Spring Boot, Spring Security, JWT, MongoDB, Redis, Docker, Gemini API

- Developed a scalable recruitment platform using Java and Spring Boot, enabling recruiters to manage job postings and candidates to search, apply, and track applications through secure backend services.
- Integrated Gemini API for AI-based resume parsing, job recommendations, and skill-gap analysis to improve candidate matching and deliver intelligent recruitment workflows.
- Implemented RESTful APIs with JWT authentication, Role-Based Access Control (RBAC), Redis caching, Docker, and automated email notifications to improve application security, scalability, and reliability.

Microservices-Based Journal Management Platform — 🐙 *2026*
Tech Stack: Java, Spring Boot, Spring Security, JWT, Microservices, Redis, MongoDB

- Designed and developed a scalable microservices-based platform using Java and Spring Boot, applying distributed systems concepts to build modular and reliable backend services.
- Secured RESTful APIs using Spring Security, JWT authentication, and Role-Based Access Control (RBAC) to improve application security and reliability.
- Developed a sentiment analysis service using Gemini API and automated scheduled analysis and email notification workflows using Redis to improve application scalability and operational efficiency.

Chat-Sphere — 🐙 *2026*
Tech Stack: React.js, Spring Boot, WebSocket, STOMP, SockJS, JWT, MongoDB, Tailwind CSS

- Built a real-time chat application using Spring Boot and React.js with secure authentication and instant messaging functionality.
- Implemented WebSocket communication using STOMP and SockJS for real-time message delivery, focusing on reliable and efficient communication workflows.
- Developed secure backend services using Spring Boot, RESTful APIs, JWT, and MongoDB for chat management and user workflows.

ACHIEVEMENTS CERTIFICATIONS

- Solved **550+ Data Structures and Algorithms (DSA) problems** across LeetCode and GeeksforGeeks, strengthening algorithm development and problem-solving skills.
- Ranked **1st in the Computer Science Engineering Department** during the First and Second Year of B.Tech.
- Secured **3rd Prize** in Hackathon 2024 for developing the **Mentor Connect Platform**, demonstrating analytical thinking and software problem-solving skills.
- Completed the **NPTEL Elite Certification** in *Programming with Generative AI using Python*.
